

Malaria has contributed to poor economic performance - Mwape

By M. Mwanza

THE MINISTER OF HEALTH, Dr. Mwape, has said that malaria has contributed to poor economic performance in Zambia. He said that the disease has caused a loss of 100,000 man-days of work each year, which has cost the country \$100 million. He said that the government is committed to eradicating malaria by the year 2000.

Dr. Mwape said that malaria is a major public health problem in Zambia, and that it has caused a significant burden on the health system. He said that the disease has caused a loss of 100,000 man-days of work each year, which has cost the country \$100 million. He said that the government is committed to eradicating malaria by the year 2000.
